

FIG. 1D

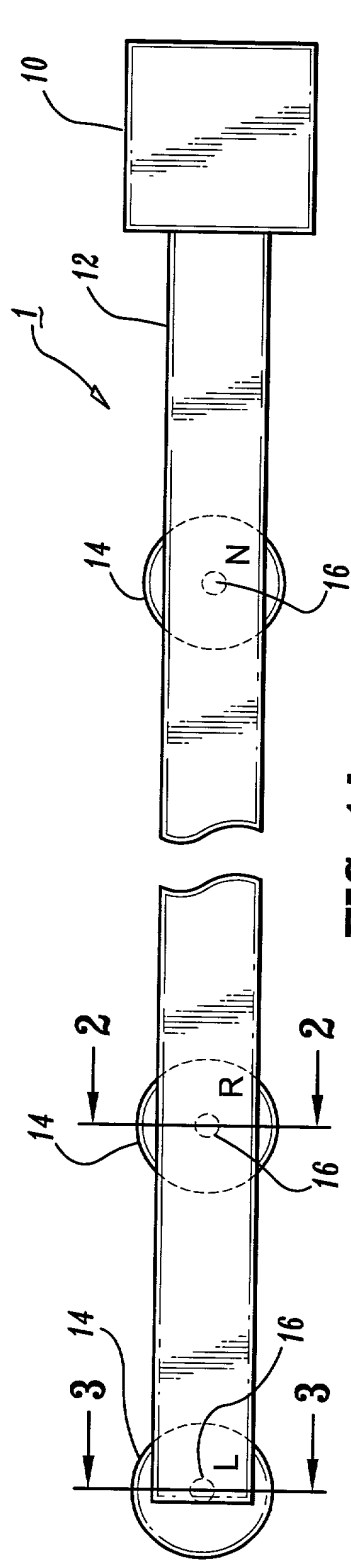

FIG. 1A

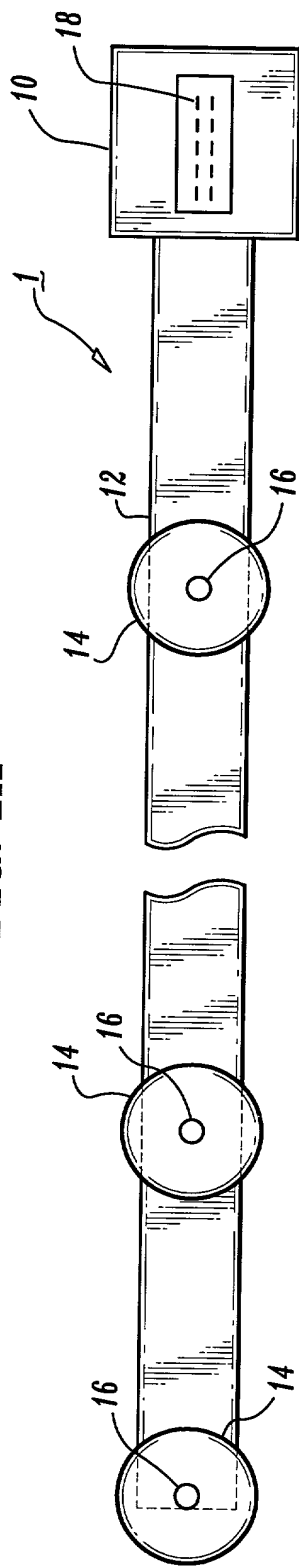

FIG. 1B

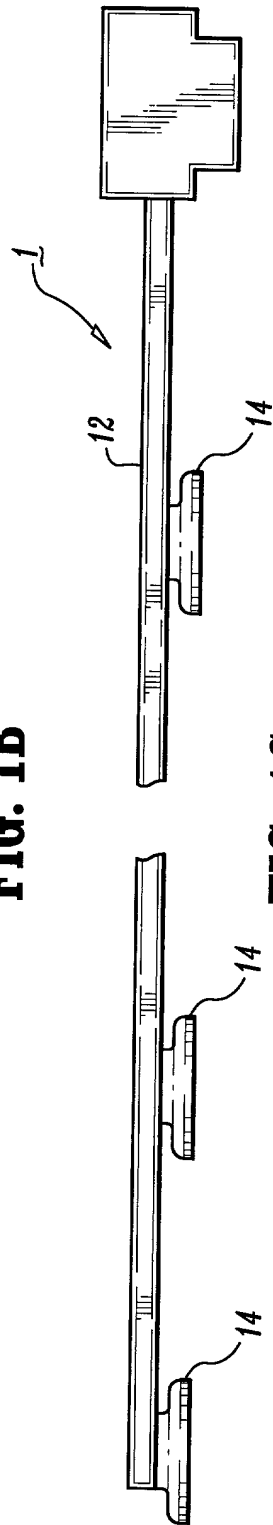

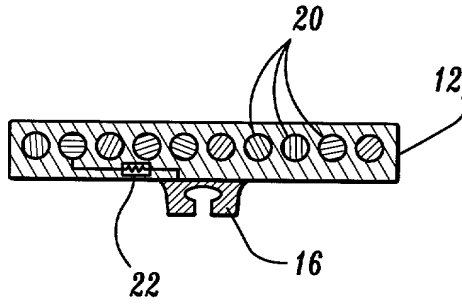

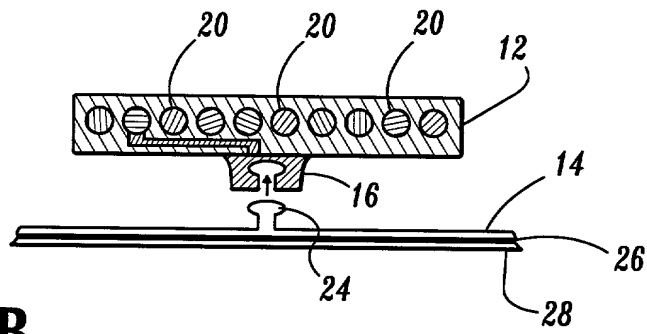

FIG. 1C

A diagram of a snake with an ECG cable and electrode positions. The snake is shown in profile, facing right. The head is at the top left, and the tail is at the bottom right. The body is labeled with 'N' for neck, 'R' for right side, 'L' for left side, and 'F' for front. The tail is labeled '11'. The head is labeled '10'. The body is labeled '12'. The ECG cable is labeled 'A 12-lead ECG snake cable'. The electrodes are labeled C1, C2, C3, C4, C5, and C6. C1 is on the right side of the neck. C2 is on the left side of the neck. C3 is on the left side of the body. C4 is on the right side of the body. C5 is on the left side of the body. C6 is on the right side of the body. The cable is connected to a box labeled '10'.
